You can be sure to be taken to all of the best sights while being entertained by your guide with interesting details and fun facts. Here we have some of the best Japan tour packages, a way for you to experience Japan without all the headaches of creating a personal itinerary. But let's start this post by answering some general questions you might have about Japan package tours. There is a really good chance that this post contains affiliate links. If you click one of them, we may receive a small commission (for which we are deeply grateful) at no extra cost to you. 5 days in Japan is enough to see the iconic Mount Fuji What are the best tour companies for Japan? The list of tour companies operating in Japan is very long. You have well-known international brands as well as many local niche companies. The short answer is that there is no one-size-fits-all tour company. Each tour company adds its own accents to a tour. You can opt to go for a tour operator you've used before and particularly liked. Chances are they also operate tours in Japan. But why not try one of the local niche companies. They are very passionate about their country and know it inside and out. I understand that you may be a bit reluctant to confide your hard-earned money to a relatively small and unknown company. For this reason, we use TourRadar.

TourRadar is an online travel agency that brings together over 200 multi-day tours from a wide selection of tour operators, both international and local. Their interface makes it really easy to compare the various options and you can read reviews from real travelers. TourRadar is a trustworthy organization. It started in 2010 and had over 1 million departures already. 20% of their bookings are coming from repeat customers. Here are some more advantages of using TourRadar: Instant confirmation24/7 supportNo booking or credit card feesLowest Price Guarantee: If you find the same tour cheaper somewhere else TourRadar will match the priceEvery booking earns 3% travel credits that you can use to make your next vacation even cheaper Which Japan tour package is the best? We browsed through the complete list of tours while making this selection. Here are our best tips to find the tour that suits your needs. Below are the main points where the tours differ. Getting an idea of your expectations about these points will help you choose the tour. You can make your selection based on these criteria - Destinations: This is off course pretty obvious. Although tourist hotspots such as Kyoto and Tokyo are included in most tours less touristic places such as Hiroshima are only included in some. If you have some destinations that you absolutely want to see you can make your first selection based on this. Interests: Almost all tours will take you to the country's popular highlights, such as Kyoto and Tokyo. If you have specific interests you're better off with a specialized tour. Japanese anime and manga are world-renowned so we included specialized tours for lovers of this genre. Seeing the Sakura is also on many traveler's bucket list so we also included special tours during this season. Although not included in our overview gourmands can will also be able to find special food tours on TourRadar. Comfort vs price: Some tours cater for backpackers and include overnight stays in shared rooms. This makes them considerably cheaper than other tours where you stay in private rooms. Make sure to check the included accommodation. Pace of the tour: Some of these tours are really designed to show you as much as possible in the limited number of days that you have. They're fast-paced and can be exhausting. If you think you will never return to Japan you may want to fit in as many sights as possible but if chances are you will come back to this beautiful country there's no reason for such a jam-packed tour. All-guided vs free time: Some tours are planned down to the minor details while others allow for a lot of free time. A fully-guided tour is the best way to see most of the country but a tour with a lot of free time can give you a good balance between group activities and me-time. We also included some self-guided tours. The tour company has worked out the complete itinerary and you can follow it at your own pace. Group size: Some tours use larger groups to lower the price. If you don't mind joining a larger group this can save you a few bucks. TourRadar lists the minimum and maximum number of participants for each tour. This impressive torii gate marks the entrance to the Meiji Shrine in the heart of Tokyo How much is a Japan tour package? Prices for a tour package range on average from 200 USD to 370 USD per person per day. Whether your tour will be in the lower or upper end of this range will largely depend on the comfort you choose. Cheaper tours tend to include accommodation in hostels, or low-end hotels. More expensive tours include accommodation in 3 and 4-star hotels. Flexible tours: Some tours that only include limited guided excursions and offer plenty of free time to explore the destinations on your own are usually also cheaper. If you don't mind exploring Japan on your own you can opt for a self-guided tour where the itinerary and all documentation, as well as train tickets, will be provided giving you the ability to explore the country at your own pace. Best Japan tours Best 5-day Japan tour packages If you would ask me I would say that you need at least 7 days, or better yet 10 days, to see Japan. But I get that there can be many reasons why you only have 5 days. With so few days it is a matter of making the most of this short period. Planning these days yourself can be overwhelming for first-time visitors, especially with so much to see and do. That's why I would recommend booking a five-day tour in this case. While there is further insight into a Japan 5-day itinerary here, a five-day tour is a great choice as tours are organized and arranged by people much more experienced with the country who can prioritize the best places to see to create the best experience. This allows you, the traveler, to maximize your time and have the most varied trip within a short amount of time. Some of the best five-day tours in Japan available have been further explored here. Best 7-day Japan tour packages A seven-day tour is also a popular choice as it allows a full week for exploring. An upside to seven-day tours is that there is often more time to visit a slightly out-of-the-way city or town for a day. These can often include cities like Nara which may be missed otherwise. Best 10-day Japan tour guide packages While 5 and 7-day Japan tours are popular choices, especially for first-time visitors, a 10-day Japan package tour is in my opinion the ideal length for a first visit. If you have the time I would still recommend a 2-week or 3-week visit but 10 days is ideal for those who are short on time and see and experience more of Japan. It offers a more in-depth experience, and I know that not everyone is bothered by this as much as I do, but it is also better for jet lag.
